

MAC Meeting notes February 2021

NOTES:

Introductions- quickly done

Show new website-

Upcoming conference in 2 days.

Request any agencies looking to hire send some sort of flyer to Kathy for us to get it posted.

COVID- some responders unable to receive 2nd dose of vaccine, no issues with Public Health interaction in vaccine clinics

Testing no issues

Request that all agencies send a roster of all EMT, AEMT, and Paramedics that have completed the vaccine training.

Policy/Protocol update- new- New format to fix the 'Blurriness' issues of the most recent updates.

Refusal of care policy- discussion of adding patient information gathering language to the 'Release at scene'

Refusal of care form- for those without already approved form.

Trauma destination protocol- discussion of adding individual facility (Renown) color coding for traumas- was decided not necessarily appropriate for us as an agency

Trauma Care protocol- TXA changing wording 'systolic' 'and/or' and possibly removing the HR restriction

Crush injury- consider adding Albuterol

Bradycardia protocol updated dose to 1mg

Care of minors protocol update

BRUE- add age range

Pain protocol- good discussion on Toradol dosing and ETCO₂ use possibly add wording of recommended etco₂ use earlier in protocol.

IFT Protocols

Discussion of adding NorEpi, Zyprexa, TPA, Hydroxycobalmine and TPN..... not sure what we will be able to accomplish, investigation will be needed.

Discussed Ketamine as a drip during ventilated transfers with transfer order- believe it is handled the same as a Versed drip as drug is in scope- will research.

Future: with protocols nearing completion the transition will be to focus on training on the protocols and beyond, BLS and ALS including CE.

END
