

# + The California Opioid Prevention by EMS (COPE) Course

The COPE Course is a continuing education resource made available as a part of the COPE Project for all California EMTs and Paramedics. The course covers important topics such as an update on new synthetic opioids, a discussion on cultural competence and self care, and pragmatic strategies for EMS-driven prevention programs addressing the opioid crisis.

- Free to take
- 2.0 hours of free CEUs (for CA license/certification renewal)
- Industry-leading presenters
- Up-to-date and relevant information

## MODULES:

# 01

In the first module of the course, [Dr. Jacob Levin](#), of UCSF Emergency Medicine and Toxicology teams, will take you on a Star-Wars-themed journey highlighting the recent proliferation of fentanyl analogues, with discussion on clinical findings, appropriate care, and provider safety.

# 02

Next, [Kristen Marshall](#), a harm reduction program leader, and [Ashley Jardin](#), a San Francisco paramedic, share enlightening perspectives on cultural competence grounded in appropriate self care. Don't miss this powerful session.

# 03

In the final module, [Dr. Gene Hern](#), a medical director, emergency medicine physician, and opioid programming leader, shows you an incremental, pragmatic approach to opioid programming. Learn how to take the lead on opioid programs for your own community.
