Good morning,

On Tuesday June 15, 2021 we will be making the transition from the current 'Protocols' to the new 'Policy and Treatment Guidelines'.

The changes that have occurred over the last year has substantially changed the Protocols of the past, and we are now ready to reorganize the current system.

The Guidelines and Policies should be easier to find in the new format and is done with the intent of making everything easier to find. This will take us from the current 19 folder system to the following system:

- 1000 Treatment Guidelines
- 2000 Certifications
- 3000 PreHospital Providers
- 4000 Hospitals
- 5000 Administration
- 6000 Training

There will potentially be some delay in the transition from the application "Acid Remap-Paramedic Protocol Provider" on Iphone/Android devices and Nor-Cal EMS, this **WILL NOT** affect patient care in any form, as the protocols are unchanged, just "Re-Numbered" and reorganized.

Please contact me with any questions,

Mark Thomas
EMS Specialist
